

Standards development organizations
Introduction

CSCI E 45a: The Cyber World – part A

1 Copyright © Scott Bradner & Ben Gaucherin 2016

Introduction: learning goals

- Understand where cyberworld technology standards come from
- Understand the history and processes of the International Telecommunication Union
- Understand the history and processes of the Internet Engineering Task Force

2 Copyright © Scott Bradner & Ben Gaucherin 2016

Introduction: this module

- This module deals procedures and policies, no technology

3 Copyright © Scott Bradner & Ben Gaucherin 2016

Topics

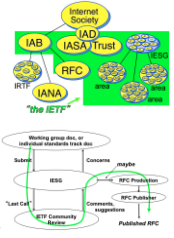

- IT standards development organizations (SDOs) – R
Review of the landscape of IT SDOs
- ITU history – O
The history of the International Telecommunication Union (ITU)
- ITU-T process – O
How the ITU-T makes IT standards
- IETF history – R
The history of the Internet Engineering Task Force (IETF)

4 Copyright © Scott Bradner & Ben Gaucherin 2016

Topics, contd.

- IETF purpose – R
What the IETF thinks its purpose is
- IETF structure – O
The structure of the IETF
- IETF operations – O
How the IETF develops its standards
- IETF management – O
How IETF management is selected

5 Copyright © Scott Bradner & Ben Gaucherin 2016

Topics, contd.

- IETF documents – R
A roadmap to IETF documents
- IETF IPR – R
The IETF's copyright & patent rules
- Publishing a RFC – O
The different paths to get a RFC published in the IETF

6 Copyright © Scott Bradner & Ben Gaucherin 2016

Technology standards
ITSDO landscape

CSCI E 45a: The Cyber World – part A

1 Copyright © Scott Bradner & Ben Gaucherin 2015

IP Standards Development Organizations

- Many SDOs involved in Internet or Internet Protocol standards development
- Many do not interact with others in any formal way
- E2e Internet enables isolated development of “standards”
- Following are some of the more important ones & what cyberworld area they work in

2 Copyright © Scott Bradner & Ben Gaucherin 2015

ITU-T

- International Telecommunication Union
ITU Telecommunications Standardization Sector
Founded: 1993, history to 1865
Area: telecommunications
Member-based participation
Members: countries (member states) & companies
Member states approve standards
Working documents: private
Standards: public

3 Copyright © Scott Bradner & Ben Gaucherin 2015

IEEE-SA

- The Institute of Electrical and Electronics Engineers Standards Association

Founded: 1963, history to 1884

Area: physical network (802)

Member-based participation

Members: companies & individuals

Members approve standards

Working documents: private

Standards: 802 – free after 6 months

4

Copyright © Scott Bradner & Ben Gaucherin 2015

ISO

International Organization for Standardization

- International Organization for Standardization

Founded: 1947, history to 1926

Area: information technology & IT security, country codes

Member-based participation

Members: countries (member bodies)

Members approve standards

Working documents: private

Standards: fee

5

Copyright © Scott Bradner & Ben Gaucherin 2015

IETF

I E T F®

- Internet Engineering Task Force

Founded: 1986, history to 1969

Area: Internet technology

Participant-based participation

Open participation by individuals

Management committee (IESG) approves standards

Working documents: public

Standards: public

6

Copyright © Scott Bradner & Ben Gaucherin 2015

JTC1

- ISO/IEC JTC 1 (Joint technical committee)
Founded: 1987 by ISO & IEC
Area: where ISO & IEC IT standards are done
Member-based participation
Members: national standards bodies
Members approve standards
Working documents: private
Standards: some public

7

Copyright © Scott Bradner & Ben Gaucherin 2015

ETSI

- European Telecommunications Standards Institute
Founded: 1988
Area: telecommunications
Member-based participation
Members: organizations
Technical committee approves regular standards, EU national standards organizations approve EU standards
Working documents: private
Standards: public

8

Copyright © Scott Bradner & Ben Gaucherin 2015

W3C

- World Wide Web Consortium
Founded: 1994
Area: world wide web
Member-based participation
Members: organizations
Management committee (Advisory Committee) approves standards
Working documents: public
Standards: public

9

Copyright © Scott Bradner & Ben Gaucherin 2015

3GPP

- 3rd Generation Partnership Program

Founded: 1998
Area: cellular telephony
Member-based participation
Members: members of supporting SDOs
Supporting SDOs approve standards
Working documents: public
Standards: public

10 Copyright © Scott Bradner & Ben Gaucherin 2015

International SDOs, Traditional

- Tend to be carrier centric
- Governments or national SDOs in approval process

11 Copyright © Scott Bradner & Ben Gaucherin 2015

Open vs. Closed Standards & SDOs

- Multiple definitions of a “open” SDO

Anyone can participate for free
Anyone can participate but have to pay a fee

Process to ensure that all impacted by a standard get to comment during development process

12 Copyright © Scott Bradner & Ben Gaucherin 2015

Open standards

- multiple definitions of “open” standards
 - Standards that come from an “open process”
 - Standards available to anyone for free
 - Standards available to anyone but may have to pay a fee
 - Standards with no licensing required for implementation
 - Standards that anyone can change on their own

13

Copyright © Scott Bradner & Ben Gaucherin 2015

OpenStand, Principles

- Due process
 - Fair process & appeal mechanism
- Broad consensus
 - All opinions considered
- Transparency
 - Public comment period
- Balance
 - No dominate participant
- Openness
 - Open to all interested parties

14

Copyright © Scott Bradner & Ben Gaucherin 2015

OpenStand, Principles, contd.

- Empowering standards
 - Chosen based on technical merit
 - Global interoperability
 - Enable global competition
 - Basis for further innovation
 - Contribute to establishment of global communities
- Available
 - Available to all
 - Free or reasonable license
- Voluntary adoption
 - Market based success

15

Copyright © Scott Bradner & Ben Gaucherin 2015

Traditional Process

- Must reach consensus
- Final approval for standards by SDO with government involvement
 - Government represents interests of constituents (in theory)
- SDOs in a country are accredited by national body e.g., ANSI for U.S.

16

Copyright © Scott Bradner & Ben Gaucherin 2015

New Standardization

I E T F

- Individual or industry
- No controlling government role

17

Copyright © Scott Bradner & Ben Gaucherin 2015

Core Differentiator

multi-stakeholder

Vs

government-controlled

18

Copyright © Scott Bradner & Ben Gaucherin 2015

Telephone, 1885

- Telephone patented in 1876
- ITU started developing telephone related regulations in 1885
- 5 paragraphs of telephone regulations in 76 pages of telegraph regulations
 - Unit of charge: 5 minutes
 - Max length of call unless no one waiting: 10 minutes
- No important technology standards

4

Copyright © Scott Bradner & Ben Gaucherin 2015

Radio, 1906

Radio Regulations 1906

RMS Titanic

- Radio regulations adopted in 1906 by Radio Telegraph Convention
 - By national representatives from 29 countries
 - Mostly administrative
 - Established international spectrum registry
 - Established "SOS" as international distress signal
- Radio regulations strengthened after Titanic sinking in 1912

5

Copyright © Scott Bradner & Ben Gaucherin 2015

CCIT & CCIF, 1924 & 1925

- ITU formed:
 - International Long-Distance Telephone Consultative Committee (CCIF) (1924)
 - International Telegraph Consultative Committee (CCIT) (1925)
- Purpose:
 - "Responsible for coordinating the technical studies, tests and measurements being carried out in the various fields of telecommunications and for drawing up international standards."*

6

Copyright © Scott Bradner & Ben Gaucherin 2015

ITU, 1932

Radio Telegraph Convention & International Telegraph Union

- Radio Telegraph Convention and International Telegraph Union (ITU) merged to become the International Telecommunication Union (ITU)

Telecommunication: *any telegraphic or telephonic communication of signs, signals, writing, facsimiles and sounds of any kind, by wire, wireless or other systems or processes of electric signaling or visual signaling (semaphores)*

7

Copyright © Scott Bradner & Ben Gaucherin 2015

ITU & UN, 1949

- ITU became a United Nations special agency for telecommunications January 1, 1949
- Mostly arm's length relationship

8

Copyright © Scott Bradner & Ben Gaucherin 2015

CCITT, 1956 & 1993

- The Consultative Committee for International Telephony (CCIF) & the Consultative Committee for International Telegraphy (CCIT) merged to become the Consultative Committee for International Telegraphy and Telephony (CCITT) in 1956

Hundreds of technical standards
CCITT became the ITU Telecommunication Standardization Sector (ITU-T) in 1993

9

Copyright © Scott Bradner & Ben Gaucherin 2015

ITU today

- Three sectors:
 - Radiocommunication (ITU-R)
 - Standardization (ITU-T)
 - Development (ITU-D)
- Membership:
 - Member states – countries
 - Almost all UN countries
 - Size-based fee
 - From \$20K to \$10.8 M (U.S. & Japan) (2023)
 - Sector members (ITU-T)
 - \$36,404 /year (2023)

Technology standards
ITU-T process

CSCI E 45a: The Cyber World – part A

1 Copyright © Scott Bradner & Ben Gaucherin 2015

ITU decision makers

- All actual decisions are made by member states
Structure, program and technology

2 Copyright © Scott Bradner & Ben Gaucherin 2015

ITU WCIT

- World Conference on International Telecommunications
Multi-week conference
Held from time to time
More than 25 year gap 1988-2012
Only member states can participate
- Reviews & revises ITU treaty
Unilaterally determines ITU roles

3 Copyright © Scott Bradner & Ben Gaucherin 2015

ITU Plenipot

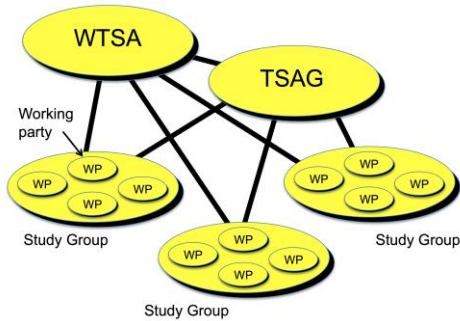

- ITU Plenipotentiary Conference
 - Multi-week conference
 - Held every 4 years
 - Only member states can participate
- Sets ITU overall strategic direction and elects ITU senior leadership
 - Can include quite specific goals for regulatory policies

4

Copyright © Scott Bradner & Ben Gaucher in 2015

ITU-T structure, higher level

5

Copyright © Scott Bradner & Ben Gaucher in 2015

WTSA

- World Telecommunication Standardization Assembly
 - Multi-week conference
 - Held every 4 years
 - Only member states can participate
- Defines ITU-T structure, management, work plan and work procedures

6

Copyright © Scott Bradner & Ben Gaucher in 2015

TSAG

- Telecommunication Standardization Advisory Group
- Responsibilities
 - Manage ITU-T activities
 - Review progress on WTSA goals
 - Guide SG work plans
 - Relationships with other SDOs
- Membership
 - SG chairmen
 - Member representatives
 - TSAG management (Chair etc.)

7 Copyright © Scott Bradner & Ben Gaucher in 2015

Study Group

- SGs manage working parties
- Number and role of SGs change from time to time
- SG management includes
 - Chair & multiple Vice Chairs
- SG includes multiple topic specific Working Parties (WP)
- WP deals with multiple Questions
- Questions managed by Rapporteur(s)

8 Copyright © Scott Bradner & Ben Gaucher in 2015

ITU-T standards development workflow

1. Organization X becomes a member of ITU-T and identifies an ICT need or need of standardization.
2. X submits the suggested research item to the relevant ITU-T Study Group.
3. Study Group approves the idea as a study Question and allocates the work to a Working Party (WP).
4. The WP assigned to work on X's Question starts work on the development of a new ITU-T Rec.
5. The draft Rec. is submitted to an SG/WP meeting and if considered mature it is given Consent to move forward into the Alternation Approval Procedure (AAP).

- Contribution driven
 - Could be suggestion for new work areas, a draft recommendation or an update to an existing recommendation
- Submit to SG
- May be assigned to a WP
- WP develops draft recommendation
- Submit draft recommendation to SG/WP meeting for "consent"

9 Copyright © Scott Bradner & Ben Gaucher in 2015

ITU-T approval workflow

- If consented
4-week last call for comments by member states
- If no comments (or only editorial comments)
Draft is considered approved
- If substantive comments
Post comments for 3-week review
- If more substantive comments received
Sent to SG plenary for discussion & possible approval

10

Technology standards
IETF history

CSCI E 45a: The Cyber World – part A

1 Copyright © Scott Bradner & Ben Gaucherin 2015

In the beginning

Steve Crocker

- 1968: Network Working Group formed
Ad-hoc group “concerned with the HOST software, the strategies for using the network, and initial experiments with the network” – RFC 3
The Network Working Group name lived on in RFCs until late 2009
- April 1969: RFC 1
Host Software – Steve Crocker
Jon Postel became RFC Editor

2 Copyright © Scott Bradner & Ben Gaucherin 2015

In the beginning

Vint Cerf

Dave Clark

- October 1969: the ARPANET started to be deployed
- 1974: Cerf & Kahn publish first version of TCP/IP (ITCP)
- 1979: Internet Configuration Control Board (ICCB) formed
“To guide the technical evolution of the Internet Protocol suite”
Formed by Vint Cerf (ARPANET Program Manager at DARPA)
Chair: Dave Clark (MIT)

3 Copyright © Scott Bradner & Ben Gaucherin 2015

Internet Advisory Board (IAB)

- 1983: ARPANET moved to TCP/IP
- 1983: ICCB reorganized into the Internet Advisory Board (IAB)
Reorganized by Barry Leiner – then APANET Project Manager
- 10 research task forces

4

Copyright © Scott Bradner & Ben Gaucherin 2015

IAB task forces

- Gateway Algorithms
- New End-to-End Service
- Applications Arch. and Requirements
- Privacy
- Security
- Interoperability
- Robustness and Survivability
- Autonomous Systems
- Tactical Internetting
- Testing and Evaluation

5

Copyright © Scott Bradner & Ben Gaucherin 2015

Internet Activities Board (IAB)

- 1986: IAB reorganized into the Internet Activities Board (IAB)
Reorganized by Dennis Perry – then APANET Project Manager
- 7 task forces
 - Internet Engineering
 - Internet Architecture
 - Autonomous Networks
 - New End-to-End Services
 - User Interface
 - Privacy and Security
 - Scientific Requirements

6

Copyright © Scott Bradner & Ben Gaucherin 2015

Internet Engineering Task Force (IETF)

Brass, Hans-Werner	U. of Mich.	• 1 st meeting January 1986
Branan, Mike	IBNCO	• 21 attendees
Cullen, Ron	IBN Lab	• Linkabit in San Diego, CA
Chappo, Noel	MIT/Princeton	
Elbridge, Charles	Sperry	
Crone, David	MITRE	
Branan, Robert	IBNCO	
Martin, James	IBM	
Mittl, David (Chairman)	Lockheed	
Nagle, John	IBM/Amesbury	
Nash, Ronald	IBM	
Balkinsky, Carl	SPYLR	
Shachar, Yehoshua	IBM	
Su, Jee-Sing	IBM Lab	
Tanaka, Choshio	MIT-LCS	
Zhang, Lixin	MIT-LCS	

22 Additional Attendees (5)

Chen, David	MEFAC
Compton, Mike	DCA
Dorning, Steve	Stanford
Moore, Robert	NSA/CSS
St John, Mike	DCA (DMZ)

IETF Areas of Concern -

- Protocol Development and Stabilization
- Protocol Conformance
- An Implementation Support Organization
- Internet Performance Measurements
- ISO Convergence

7 Copyright © Scott Bradner & Ben Gaucherin 2015

Internet Activities Board (IAB) –v2

Vint Cerf – IAB Chair

Phil Gross – IETF Chair

Dave Clark – IRTF Chair

- 1989: IAB reorganized:

Reduced to 2 task forces:

- Internet Engineering Task Force: IETF
- Internet Research Task Force: IRTF

Established:

- Internet Engineering Steering Group
- Internet Research Steering Group

IAB Membership selected by chair

SG membership picked by IAB

IAB roles:

- Approves Internet standards
- Manages RFC publication
- Review IETF & IRTF operations
- Performs Internet strategic planning
- Internet technical policy liaison

8 Copyright © Scott Bradner & Ben Gaucherin 2015

Internet Architecture Board (IAB)

- 1992: Internet Society (ISOC) formed
- IAB met in Kobe Japan after INET92
- IAB reorganized to form Internet Architecture Board (IAB)
- Chartered by ISOC
- Increased role of IESG in standards development

9 Copyright © Scott Bradner & Ben Gaucherin 2015

IAB, Kobe & IPv7

Proceedings of the Twenty-Fourth Internet Engineering Task Force
Massachusetts Institute of Technology
NEARnet
Cambridge
July 13-17, 1992

- 1992: The IAB, after the meeting in Kobe, published *IP Version 7*
- Which recommended:
An immediate IETF effort to prepare a detailed technical and organizational plan for using CLNP as the basis for IPv7.
- Caused heated discussion in IETF community
Issues:
 - Who makes IETF decisions
 - How best to evolve Internet Protocol

10 Copyright © Scott Bradner & Ben Gaucherin 2015

POISED WorkingGroup

Steve Crocker

- Vint Cerf called for new working group to examine processes and IESG/IAB selection processes
- POISED working group formed
Chaired by Steve Crocker
- Restructured IETF/IAB
- Moved to nominations committee-based selections process

11 Copyright © Scott Bradner & Ben Gaucherin 2015

Structure since 1992

I E T F

- Working groups organized into Areas
- Areas managed by Area Directors (ADs)
- ADs + IETF Chair = the IESG
- The IESG runs the IETF and is the standards review & approval body
- The IAB provides architectural advice, etc.
- ADs & IAB members picked by a nomcom

12 Copyright © Scott Bradner & Ben Gaucherin 2015

The Internet Society emerging

- October 26, 1989: discussion of IETF liability
- Late 1989-early 1991: Vint Cerf & Bob Kahn started talking about forming the Internet Society

Vint & Bob were at the Corporation for National Research Initiatives (CNRI) CNRI was serving as the IETF's secretariat

- August 30, 1991: ISOC announced

13

Copyright © Scott Bradner & Ben Gaucherin 2015

The Internet Society emerging, contd.

- June 15, 1992: First Board meeting in Kobe, Japan
- Dec 11, 1992: ISOC incorporated as a 501(c)3 tax-exempt charitable organization in Washington, DC, USA

14

Copyright © Scott Bradner & Ben Gaucherin 2015

Internet Society activities

- Support for Internet Technical Evolution
IAB & IETF
Offered to be IETF legal home & provide liability shield
- Meetings and Conferences
INET conferences
- Information and Infrastructure Services
Publish technical newsletter

15

Copyright © Scott Bradner & Ben Gaucherin 2015

Internet Society restructure

The Internet Engineering Task Force (IETF) is an organized activity of the Internet Society (ISOC).

- 1996: ISOC Board reorganized, charter memberships ended
- 1996: IETF accepted ISOC's legal housing offer with RFCs 2026 and RFC 2031
 - ISOC purchased insurance for IETF decision makers
- IETF is described as an "organized activity of the Internet Society"
 - IETF has no independent legal standing

16

Copyright © Scott Bradner & Ben Gaucher in 2015

IASA & IAOC

- IETF agreed that ISOC was the IETF financial home with RFC 4071 (a.k.a. BCP 101) in 2005
 - All IETF funding handled by IETF Administrative Support Activity (IASA) ISOC under direction of the IETF Administrative Oversight Committee (IAOC)
 - Members include IETF & IAB chairs, ISOC President and people appointed by IETF nomcom, IAB, and ISOC Board

17

Copyright © Scott Bradner & Ben Gaucher in 2015

ISOC re-restructure

- ISOC was originally a direct membership organization
- 2002: Public Interest Registry formed (.org)
 - Major ISOC funding source
- 2003: Board selection revised:
 - Trustees selected by IETF, and elected by chapters and organizational members

18

Copyright © Scott Bradner & Ben Gaucher in 2015

IETF Funding

- Meetings and publications supported by U.S. government agencies until 1997
- Meeting fees started in March 1991 (IETF 20)
Initially to defray some IETF meeting costs
Later increased to also support Secretariat
- ISOC funding started in 1995
- U.S. funding ended in 1997
- Current funding from meeting fees, sponsors + ISOC

19

Technology standards
IETF purpose & scope

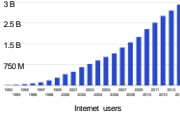

CSCI E 45a: The Cyber World – part A

1 Copyright © Scott Bradner & Ben Gaucherin 2015

IETF purpose

- Develop and maintain standards for technologies used to provide Internet service or to provide services over the Internet
- Ensure that the technology:
 - Can perform needed functions
 - Will support the proper deployment and will scale
 - Is secure and can be operated securely
 - Is manageable
- IETF produces standards and other documents

2 Copyright © Scott Bradner & Ben Gaucherin 2015

IETF “standards”

What is a mandatory standard?
A mandatory standard is a standard that requires compliance because of a government statute or regulation, an organization internal policy, or contractual requirement. Failure to comply with a mandatory standard usually carries a sanction, such as civil or criminal penalties, or loss of employment. (Source: ANSIs “Standards Management: A Handbook for Proff”)

- IETF standards: not ‘because we say so’ standards
- They are standards only if people use them
 - Formal SDOs can create legally mandated standards
- No formal recognition for IETF standards
 - By governments or “approved” standards organization
 - Lack of formal government input to the IETF is seen as “a problem” by some

3 Copyright © Scott Bradner & Ben Gaucherin 2015

The scope of the IETF

- *'Above the wire and below the application'*
IP, TCP, email, routing, IPsec, HTTP, FTP, ssh, LDAP, SIP, mobile IP, ppp, RADIUS, Kerberos, secure email, streaming video & audio, ...
- But wires are getting fuzzy
MPLS, GMPLS, pwe3, VPN, ...
- Generally hard to clearly define IETF scope
IETF is constantly exploring the edges
e.g., (IP) telephony

4 Copyright © Scott Bradner & Ben Gaucherin 2015

Technology standards
IETF structure

CSCI E 45a: The Cyber World – part A

1 Copyright © Scott Bradner & Ben Gaucherin 2015

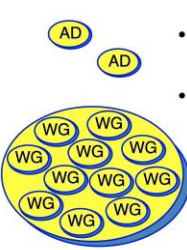

Working groups & areas

- Many Working Groups
 - Working Group Chairs: manage working group
 - Document Editors: edit individual documents
- Working groups organized into Areas, each with Area Directors (ADs)
 - Number of areas changes from time to time

area

3 Copyright © Scott Bradner & Ben Gaucherin 2015

Area directors (ADs)

- Technical areas have 2 or 3 ADs
- Responsible for setting direction in Area
- Review working group documents prior to IESG review

4 Copyright © Scott Bradner & Ben Gaucherin 2015

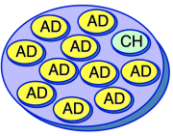

Area directors (ADs), contd.

- Responsible for managing process in Area
 - Sponsor BOFs & propose working groups
 - Ensure working groups follow proper process
 - Have authority to change working group management
 - Generally with IESG consultation

5 Copyright © Scott Bradner & Ben Gaucherin 2015

Internet Engineering Steering Group (IESG)

- ADs + IETF Chair
- Multi-disciplinary technical review group
- Provides cross-area pre-publication technical review of IETF RFCs
- Approves publication of IETF documents
 - Reviews and comments on non-IETF RFC submissions

IESG

6 Copyright © Scott Bradner & Ben Gaucherin 2015

IESG, contd.

IESG

- Manages IETF process
- Approves BOFs
- Approves WG creation (with IAB advice)
- Part of appeal chain
- The IAB chair & an IAB liaison are ex-officio members of the IESG

7

Copyright © Scott Bradner & Ben Gaucherin 2015

Internet Society (ISOC)

Larry Landweber

- Non-profit, non-governmental, independent, international organization
Large numbers of organizational members, individual members & chapters in many countries
- Formed in 1992 to:
Provide legal umbrella over IETF & to continue Landweber developing country workshops

8

Copyright © Scott Bradner & Ben Gaucherin 2015

ISOC, contd.

The Internet is for everyone.

RFC 2026
RFC 2031

- ISOC mission:
"To promote the open development, evolution, and use of the Internet for the benefit of all people throughout the world."
- IETF agreed to come under ISOC legal umbrella in 1996
After a (long) open working-group-based discussion

9

Copyright © Scott Bradner & Ben Gaucherin 2015

ISOC, contd.

- ISOC was the organizational and administrative home for IETF (2005-2019)
 - Legal umbrella, insurance, budget, bank account, etc.
 - Replaced by IETF Administrative LLC
- ISOC & IETF
 - ISOC Board of Trustees part of appeal chain
 - ISOC President appoints chair of nomcom
 - IAB chartered by ISOC
 - ISOC President is on the IAB list & calls
- IETF (through IAB) appoints 4 ISOC trustees

10

Copyright © Scott Bradner & Ben Gaucher in 2000

Internet Architecture Board (IAB)

- Provides overall architectural advice & oversight to IESG, IETF, IRTF & ISOC
- Deals with IETF external liaisons
- Appoints IRTF chair
- Selects & oversees IETF-IANA
- Appoints & oversees RFC Editor
 - IAB role under discussion

11

Copyright © Scott Bradner & Ben Gaucher in 2000

IAB, contd.

- Chartered by & advises the ISOC Board
- Approves IESG slate from nomcom
- Step in appeals chain
- Provide input to IESG on WG formation & charters
- Convene topic-specific workshops
 - Mostly invitation only

12

Copyright © Scott Bradner & Ben Gaucher in 2005

IANA, contd.

- Need to define top level domains (TLDs) - e.g., .com, .ca, .us, ...
- Maintains root server database of TLD server addresses
- The IANA predates the IETF
- IANA function currently preformed by ICANN under a MoU with the IETF

16

Copyright © Scott Bradner & Ben Gaucher in 2000

IANA, contd.

- Internet Drafts need to include a “IANA Considerations” section
Section tells the IANA what assignment actions are needed if ID is to be published as a RFC
Can say “no IANA actions required”
See RFC 5226 for details
- IDs reviewed by IANA during IESG consideration

17

Copyright © Scott Bradner & Ben Gaucher in 2005

IETF Secretariat

- Association Management Solutions, LLC - Fremont, CA, USA
managed by IETF Administrative LLC
- Runs
plenary meetings, mailing lists, Internet-Draft & directory, IESG teleconferences, REF editing & publication
- Coordinates
day to day work of IESG

18

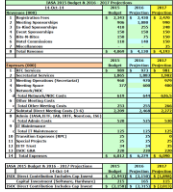

Copyright © Scott Bradner & Ben Gaucher in 2000

IETF Administrative LLC

- Non-profit (501(c) 3) corp.
- Provides the administrative structure required to support the IETF standards process: see RFCs 8711, 8713 & 8717
- LLC board members selected by IETF nomcom
- ISOC provided initial funding
- **Has no authority over the standards process**

19 Copyright © Scott Bradner & Ben Gaucher in 2000

IETF LLC, contd.

- Develops budget for IETF
Money from meeting fees, meeting-related sponsors & from ISOC
- Responsible for IETF finances
- Contracts for IETF support functions
Secretariat functions, RFC evaluation and publication & IETF-IANA

20 Copyright © Scott Bradner & Ben Gaucher in 2005

IETF Trust

- Created in Dec 2005 to hold IETF-related IPR
Copyrights (on RFCs etc)
Domain names (e.g., ietf.org, rfc-editor.org)
Trademarks
Software paid for by IETF
Databases
Etc.
- IPR created under IETF contracts goes to Trust

21 Copyright © Scott Bradner & Ben Gaucher in 2005

IETF Trust, contd.

- The IETF Trust is not a patent pool
- Publishes a document outlining Trust legal provisions:

Legal Provisions Relating to IETF Documents
<https://trustee.ietf.org/documents/trust-legal-provisions/>

IETF TRUST
Legal Provisions Relating to IETF Documents

22 Copyright © Scott Bradner & Ben Gaucherin 2023

IETF Procedures

CSCI E 45a: The Cyber World – part A

1 Copyright © Scott Bradner & Ben Gaucherin 2015

People, not companies

- People, not companies
No government or corporate “representatives”

“We reject kings, presidents and voting. We believe in rough consensus and running code”

Dave Clark

Dave Clark (1992)

2 Copyright © Scott Bradner & Ben Gaucherin 2015

Birds of a feather sessions (BOFs)

- Often precedes the formation of a Working Group
- Proposed by a group of people interested in a topic
- Need description, an agenda and an AD’s approval before a BOF can be scheduled
Some ADs require at least an Internet draft and a mailing list discussion

3 Copyright © Scott Bradner & Ben Gaucherin 2015

BOFs, contd.

- BOFs generally only meet once
- Can lead to a WG or can be a one time thing
- BOFs help convince an AD that the group have a good idea – one worth exploring & there are enough interested people to do the work

4 Copyright © Scott Bradner & Ben Gaucherin 2015

Working groups

- This is where the IETF primarily get its work done
- Most discussions on a WG mailing list
- Face-to-face meetings focused on key issues (ideally)
 - Note: face-to-face meetings generally quite short
- “Bottoms up”
 - i.e., generally proposed by IETF participants, not ADs, IESG or IETF Chair
- Sometimes preceded by a BOF

5 Copyright © Scott Bradner & Ben Gaucherin 2015

Working groups, contd.

- Working Groups are focused by charters agreed between WG chair(s) and area director
- Restrictive charters with milestones
- Charter approved by IESG with IAB advice
- After public announcement for comments
 - Announcement goes to other SDOs to check for overlaps
- IESG has final say on charter
- Working groups are closed when their work is done

6 Copyright © Scott Bradner & Ben Gaucherin 2015

How IETF work gets done

- Generally, IETF technology development is done in Working Groups but can be individual effort
- Proposal published as a working document "Internet Draft" (ID)
- The ID is revised & republished based on working group discussion
2-digit version number appended

7 Copyright © Scott Bradner & Ben Gaucherin 2015

How IETF work gets done, contd.

- When working group thinks it is ready, the Internet draft is submitted to IESG via AD
- AD performs a technical and process review of the ID
Returns ID to working group with comments if AD finds issues
- If AD approves, the IESG issues IETF-wide "Last Call" for comments
2-week if working group ID
4-week if individual ID

8 Copyright © Scott Bradner & Ben Gaucherin 2015

How IETF work gets done, contd.

- IESG performs interdisciplinary technical review of proposal & reviews Last-Call comments
Returns ID with comments if IESG finds issues
- If IESG approves, ID is sent to RFC Editor for publication as RFC

9 Copyright © Scott Bradner & Ben Gaucherin 2015

Rough Consensus

- No defined IETF membership - just “participants”
- “***Rough consensus and running code...***”
- Does **not** require unanimity
But issues need to be discussed
- No formal voting (can not define a constituency)
Can do show of hands or hum - but no count
Want to gage general level of consensus

10

Copyright © Scott Bradner & Ben Gaucherin 2015

Rough Consensus, contd.

- Disputes attempted to be resolved by discussion
On mailing list and in face-to-face meetings
- Conclusion can be by rough consensus
- Conclusions reached during a face-to-face meeting must be verified on mailing list
Not always an easy thing to do

11

Technology standards
IETF management & selection process

CSCI E 45a: The Cyber World – part A

1 Copyright © Scott Bradner & Ben Gaucherin 2015

IETF management

- IAB job: 1/3 time
- AD job: half to 3/4 time
- IETF Chair job: full time
- IAOC member: 1/5 time
- Two year terms
- All volunteers

No salary or expenses provided
People are company- or self-supported

Secretariat, RFC publication support & IAD are paid

2 Copyright © Scott Bradner & Ben Gaucherin 2015

Selecting IETF management

- Picked by a nominations committee (nomcom)
Nomcom chair appointed by ISOC president
Process described in RFC 3777
- Members selected randomly from a list of volunteers
Requirement: be present at 3 of last 5 IETF meetings
Very random process to select from volunteers: RFC 3797

The following are the seed selection that will be used on July 6, 2015 (2015-07-06).
Canadian Lottery Lotto 649
US public Debt
US intergovernmental holdings
Euromillions Lottery

Message from the 2015 IETF nomcom chair

3 Copyright © Scott Bradner & Ben Gaucherin 2015

Selecting IETF management, contd.

- Gets list of jobs to fill
List can include IETF Chair, ADs, IAB members & IAOC members
- Nomcom nominates one person for each job
IAB selections reviewed & approved by ISOC Board of Trustees
AD & IETF Chair selections reviewed & approved by IAB
IAOC selections reviewed & approved by IESG

4

Copyright © Scott Bradner & Ben Gaucherin 2015

IETF management authority

the power of the ruler is delegated by the people and continues only with their consent.

Theodore Beza – 1579 – summarized by George Sabine

- IETF management can not speak for the IETF
Unless the consensus of the IETF is known
E.g., from a consensus call on the mailing list
- IETF management can not commit the IETF to an action or to the development of specific standards
Unless the consensus of the IETF is known and there are people interested in the work

5

IETF Documents

Licenses For Use Outside the IETF Standards Process. ... The IETF Trust hereby grants to each person ... a non-exclusive, royalty-free, worldwide right ... to:

- i. to copy, publish, display and distribute IETF Contributions and IETF Documents in full and without modification,*
- ii. to translate IETF Contributions and IETF Documents into languages other than English, and to copy, publish, display and distribute such translated IETF Contributions and IETF Documents in full and without modification,*
- iii. to copy, publish, display and distribute unmodified portions of IETF Contributions and IETF Documents and translations thereof, provided that: ...*

Legal Provisions Relating to IETF Documents – Dec 2005

2 Copyright © Scott Bradner & Ben Gaucherin 2015

- All IETF documents are open i.e., anyone can download and make copies (in full)
- Internet Draft
 - IETF working documents
 - Some I-Ds are working group documents
- RFC (stands for “RFC”)
 - Archival publications (never changed once published)
 - Updates or corrections gets new RFC numbers

IETF document format

Licenses For Use Outside the IETF Standards Process. ... The IETF Trust hereby grants to each person ... a non-exclusive, royalty-free, worldwide right ... to:

- i. to copy, publish, display and distribute IETF Contributions and IETF Documents in full and without modification,*
- ii. to translate IETF Contributions and IETF Documents into languages other than English, and to copy, publish, display and distribute such translated IETF Contributions and IETF Documents in full and without modification,*
- iii. to copy, publish, display and distribute unmodified portions of IETF Contributions and IETF Documents and translations thereof, provided that: ...*

Legal Provisions Relating to IETF Documents – Dec 2005

3 Copyright © Scott Bradner & Ben Gaucherin 2015

- ASCII text is the mailing list and old document format
- English is the official language of the IETF
 - But blanket permission is given to translate any IETF document (in total) into any language for any reason
- Publishing extracts of IETF documents is also OK
 - As long as the IETF is properly acknowledged

Example ID names

- Working Group document `draft-ietf-idr-bgp4-26.txt`
26th revision of BGPv4 specification
Interdomain Routing Working Group working document
- Individual submission `draft-bradner-rfc3979bis-05.txt`
5th revision of my proposed update to RFC 3979
Not a working group document
- IAB publication `draft-iab-rfcformatreq-03.txt`
3rd revision of an IAB document on requirements for the formats of RFCs

Types of RFCs

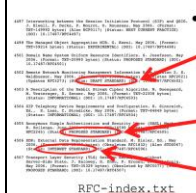

- Standards track
Technical and process standards
BCP, Proposed Standard, Internet Standard
- Informational
Technical specification requirements or background
Corporate documentation
Work of other SDOs
April Fools Day jokes
- Experimental
Ready for people to try out
- Historical
No longer recommended
- Index provides current status

Standards track RFCs

- Best Current Practices (BCP)
Policies or procedures (best we know how)
 - IETF standards process published as BCPs
RFC 2026 is the RFC that defines the IETF standards process
- `RFC-index.txt`

Standards track RFCs

- 2-stage standards track (used to be 3-stage)
- Proposed Standard (PS)
 - Full IESG review good idea, no known problems
- Internet Standard (STD)
 - PS + stable + "benefit to Internet community"
 - Multiple interoperable implementations
 - To prove document clarity
 - Note: interoperability, not conformance

RFC-index.txt

Technology standards
The IETF IPR rules

CSCI E 45a: The Cyber World – part A

1 Copyright © Scott Bradner & Ben Gaucherin 2015

Who do the rules apply to?

Note Well
 A reminder of IETF policies.

This is a reminder of IETF policies in effect on various topics such as patents or other intellectual property rights. The IETF's patent policy and the definition of an IETF contributor and participant are subject to IETF's patent model (see below).

As a reminder:

- By participating in the IETF, you agree to follow IETF processes and policies.
- If you are aware that any IETF contribution is covered by patents or other intellectual property that are not or cannot be licensed to you or your network, you must disclose that fact or not participate in the discussion.
- As a participant in our activities in any IETF activity, you acknowledge that written, audio, video, and photographic records of meetings may be made public.
- Personal information that you provide to IETF will be handled in accordance with the IETF Privacy Policy.
- As a participant in activities, you agree to make reasonable use of our participation phone contacts: ietf-announce@ietf.org, ietf@ietf.org, ietf@ietf.org, ietf@ietf.org if you have questions or concerns about this.

- All participants in the IETF are subject to the IETF's IPR rules
- Acknowledgement of rules required to register to a meeting, to sign up to a mailing list or to post an Internet draft
- A statement of the requirement is shown at the start of most IETF face-to-face sessions

2 Copyright © Scott Bradner & Ben Gaucherin 2015

ITEF IPR: two types of IPR

Annæ Reginae
Annæ Reginae.

An Act for the Encouragement of Learning, by Vesting the Copies of Printed Books in the Authors or Transcribers or Proprietors thereof.

Statute of Anne - 1709

To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries.

U.S. Constitution, Article One, section 8, clause 8

- Copyright
 The right to the text in the document
- Patent
 The right to the technology discussed in the text

3 Copyright © Scott Bradner & Ben Gaucherin 2015

IETF Copyright rules

Copyright and IETF Copyright Policies

- Why are copyrights relevant to the IETF?
- Why are patents relevant to the IETF?
- Where can I find the IETF's policy regarding copyrights?
- When did the current policy go into effect, and what about documents that have been published or submitted before that?

Copyright and IETF Copyright Policies

Copyright law protects all forms of creative expression, including written documents, images, designs, software, audio recordings, videotape, and other digital products and services. It is a legal right that gives the creator the right to control how their work is used and distributed, and to receive financial compensation for their work. Copyright law also gives the creator the right to sue for infringement of their work.

Copyright law is relevant to the IETF because almost all written documents are protected by copyright. This includes Internet-Drafts, RFCs and all other documents published by the IETF.

The IETF publishes copyright and licensing notices relating to IETF documents (Internet-Drafts and RFCs) and other contributions to the IETF process, primarily in the form of a separate document. Drafts and RFCs in the Independent Tracks, IAB Issues and IETF Issues.

Where can I find the IETF's policy regarding copyrights?

The IETF copyright policy is currently set out in two documents: RFC 1018 and the IETF Trust legal framework document. RFC 1018 documents which are copyrightable and in the "Public" or "Private" categories, expanded versions of the IETF are also available.

When did the current policy go into effect, and what about documents that have been published or submitted before that?

Copyright law applies to IETF documents published on November 15, 2003, and all applications of IETF contributions submitted on or after that date and to all IETF documents published on or after that date.

- The author(s) need to give non-exclusive publication rights to IETF Trust to get anything published
Mailing list submission, Internet Draft, RFC
- Also (normally) the right to make derivative works
This right required for standards track documents
- The author(s) retain all other rights

4 Copyright © Scott Bradner & Ben Gaucher in 2023

IETF patent rules

Worry about undisclosed (submarine) IPR

- Based on the requirement that IETF participants disclose IPR when it might relate to IETF work
- Working groups take disclosed IPR into account when developing IETF specifications
- IETF does not require that specifications not have any IPR disclosures
Working group makes up its own mind on what technology to adopt

5 Copyright © Scott Bradner & Ben Gaucher in 2015

IETF patent rules, licensing

- The IETF does not require that an IPR disclosures include licensing information
But it is requested
- The IETF does not require that working groups adopt IPR just because it has free, RAND or FRAND licensing

RAND: reasonable and non-discriminatory

FRAND: Fair, Reasonable and Non-Discriminatory

6 Copyright © Scott Bradner & Ben Gaucher in 2015

IETF patent rules, when must you disclose?

reasonably and personally means a patent search is not required, but that you, yourself, know, or should have known because of your job, of the IPR

your IPR means a patent or patent application that you or your sponsor owns or would benefit from

A/ When you **reasonably and personally** know of **your IPR** that would necessarily be infringed by someone implementing an IETF specification

Not limited to standards track documents

Note that this includes patent applications!

7

Copyright © Scott Bradner & Ben Gaucherin 2015

When must you disclose, contd.

Message: Message Header
Date: Wed, 19 Aug 2015 11:11:20 -0400
From: Scott D. Bradner <rob@bob.com>
To: IETF <ietf@ietf.org>
Subject: IETF Patent Rules - IPR
Content-Type: text/plain

From: "Scott D. Bradner" <rob@bob.com>
Date: Wed, 19 Aug 2015 11:11:20 -0400
To: IETF <ietf@ietf.org>
Subject: IETF Patent Rules - IPR
Content-Type: text/plain

blah, blah, blah

And
B/ the IPR is in a contribution you make to the IETF

Or
C/ the IPR is in a contribution someone else makes to the IETF and you are participating in any discussions on that contribution

Participating means doing anything to impact the discussion

8

Copyright © Scott Bradner & Ben Gaucherin 2015

When it would be nice if you disclosed

- The IPR is in a contribution someone else makes to the IETF and you are not participating in any discussions on that contribution

9

Copyright © Scott Bradner & Ben Gaucherin 2015

When to disclose

- Disclosures must be made as soon as practical after the realization that the IPR requires a disclosure
i.e. do not wait until last call or any other event
- Many companies insist that company lawyers make IPR disclosures

10

Copyright © Scott Bradner & Ben Gaucherin 2015

What is a disclosure & how do I make one?

File an IPR Disclosure
 The IETF requires disclosure regarding the rights or extent of any intellectual property rights or other rights that might be claimed in connection with the development or use of the specifications developed in any IETF document or the code or data in IETF documents that contain rights or other such information. The IETF requires that a disclosure be made in accordance with the following requirements:

- A disclosure is a claim of IPR
- Link on IETF home page
- What must be in a disclosure
 - IPR holder's name & contact
 - Patent (or application) information
 - Disclosure submitter's name & email
- What is also requested
 - IETF participant's name and email
 - Which IETF document or contribution triggered disclosure
 - Licensing declaration
 - Licensing type & details

11

Copyright © Scott Bradner & Ben Gaucherin 2015

What is a contribution?

Contribution
 A contribution is any submission intended to be all or part of an Internet Draft or an RFC.
 B/ submissions in the form of oral statements or email intended to be input to an IETF activity, group or function.
 Some plenary or technical talks by 3rd parties at IETF meetings are not IETF contributions.

- A/ any submission intended to be all or part of an Internet Draft or an RFC
- B/ submissions in the form of oral statements or email intended to be input to an IETF activity, group or function
 - Some plenary or technical talks by 3rd parties at IETF meetings are not IETF contributions

12

Copyright © Scott Bradner & Ben Gaucherin 2015

Working group preferences

- IETF working groups tend to prefer technology with no known IPR claims
- But the IETF has published many RFCs that had IPR disclosed prior to adoption
- It is up to the working group
- Seconded guessed by the IETF community and by the IESG

13

Technology Standards
Publishing a RFC in the IETF

CSCI E 45a: The Cyber World – part A

1 Copyright © Scott Bradner & Ben Gaucherin 2015

Getting your work done

- Three different ways to get a RFC published – will explore each way
 - IETF track: working group
All RFC types
 - IETF track: individual submission
All RFC types
 - Independent submissions track
Informational & experimental RFCs
- First thing: discuss your ideas with a few people
A “sanity check”
Listen to what they have to say

2 Copyright © Scott Bradner & Ben Gaucherin 2015

Getting your work done, contd.

draft-YLN-xxxx-00.txt
Publish using your own last name
Last name of 1st author if multiple authors

draft-YLN-wgname-xxxx-00.txt
Include the working group name if targeted at a specific working group

Note: lots of authors does not help
Limit to number of authors that may be listed on 1st page of RFCs
ID quality gaged by its contents

3 Copyright © Scott Bradner & Ben Gaucherin 2015

IETF track, working group

draft-YLN-wgname-xxxx-01.txt
draft-YLN-wgname-xxxx-02.txt
draft-YLN-wgname-xxxx-03.txt
draft-ietf-wgName-xxxx-00.txt

- If the right working group exists & topic is in its charter
- Send a message to working group mailing list
 - Announcing publication of the ID
 - Asking working group to consider the ID for adoption as working group document
- Working group is not required to adopt your ID
 - May require multiple revisions based on comments
- If adopted, republish ID with working group name

4

Copyright © Scott Bradner & Ben Gaucherin 2015

IETF track, working group, contd.

draft-ietf-wgName-xxxx-01.txt
draft-ietf-wgName-xxxx-02.txt
draft-ietf-wgName-xxxx-03.txt

- Working group will discuss the ID
- The ID is revised based on the working group discussions
- Important issues may have to be discussed at a working group session during an IETF meeting
 - Or at a working group interim meeting

5

Copyright © Scott Bradner & Ben Gaucherin 2015

IETF track, working group, contd.

draft-ietf-wgName-xxxx-04.txt
draft-ietf-wgName-xxxx-05.txt
draft-ietf-wgName-xxxx-06.txt
draft-ietf-wgName-xxxx-07.txt

- Revisions continue until working group feels ID is "done"
 - The working group chair(s) may issue a "working group last call" to determine if there is consensus that the ID is "done"
 - No defined time period for a working group last call
- Need to designate a "document shepherd"
 - Does writeup for the IESG

6

Copyright © Scott Bradner & Ben Gaucherin 2015

IETF track, working group, contd.

- The working group chair(s) then send a message to the working group's "responsible AD" asking for publication
AD = area director
- The responsible AD reviews the ID to determine if the AD feels it is ready
AD will return it to the working group, with comments, if not

draft-ietf-wgName-xxxx-09.txt

7

Copyright © Scott Bradner & Ben Gaucherin 2015

IETF track, working group, contd.

- When the AD feels the ID is ready, the AD forwards the request & writeup to the IESG
- IESG will issue a IETF-wide "last call" for comments
Also goes to other SDOs
Two-week last call period
- May receive reviews from assigned reviewers
Area directorates, Gen ART

8

Copyright © Scott Bradner & Ben Gaucherin 2015

IETF track, working group, contd.

- The IESG will then review the ID and any last call comments to determine if they think the ID is ready
IESG will return it to the working group, with comments, if not
- Individual ADs record their opinions on the ID
Can record a "discuss"

draft-ietf-wgName-xxxx-10.txt
draft-ietf-wgName-xxxx-11.txt

Track progress with datatracker
<https://datatracker.ietf.org/>

9

Copyright © Scott Bradner & Ben Gaucherin 2015

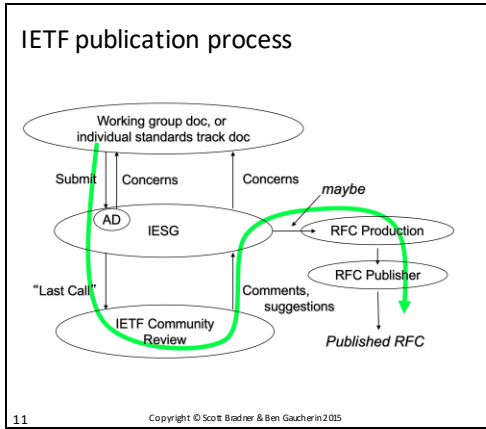

IETF track, working group, contd.

RFC Editor

RFC NNNN

- The IESG will send a publication request to the RFC Editor when they feel the ID is ready
- The RFC Editor will copyedit the ID and, after verifying any edits with you, publish a RFC

10 Copyright © Scott Bradner & Ben Gaucherin 2015

IETF track, working group, not in charter

- Working group exists but topic is not in the charter
- Work with the working group chair(s) to see if they would support revising the charter

The chair(s) do not have to agree to add the topic to the charter
If the chair(s) agree, they will work with the AD to see if the IESG agrees (they do not have to)
If not, then this path is closed

- You proceed as above if the IESG updates the charter

IETF track, no existing workinggroup

- If the right working group does not exist
Talk to an appropriate area director about holding a BOF
AD might tell you "no" or to first set up a mailing list, or use an existing mailing list, and hold a discussion
If a BOF is held & it demonstrates interest, work with the AD to try to form a working group
- Note that, generally, an ID author is not selected as a working group chair
To avoid conflicts of interest in managing discussions

13

IETF track, individual submission

- Set up a mailing list to discuss your ID
- Iterate your ID based on the discussion
- When you think it is ready talk to a AD working in the area about submitting your ID for publication
- The AD may agree to review the ID – but is not required to

14

IETF track, individual submission, contd.

- If the AD agrees to review the AD & agrees to support it after reviewing it, the process proceeds like the normal working group process
Except that the last call period is four-weeks (instead of two)

15

Independent submissions track

- Can publish non-IETF technical documents
e.g. proprietary vendor technology
- Safety valve for IETF
Can publish rejected proposals
- Can only publish informational or experimental RFCs

16

Copyright © Scott Bradner & Ben Gaucherin 2015

Independent submissions track, process

- Submit ID to Independent stream editor (ISE)
- ISE may ask RFC editorial board to review
- ISE will take reviews under consideration
- ISE then evaluates comments along with his or her own review

17

Copyright © Scott Bradner & Ben Gaucherin 2015

Independent submissions, contd

- ISE may tell authors that a revised ID is needed
- If ISE decides that the ID is proper to publish as an RFC
- ISE then asks IESG if they have an issue, IESG can:
 - Recommend not publishing
 - Ask authors to submit ID to a current working group (WG)
 - Ask authors to help form a WG
 - Say they do not care
- If all is OK, ISE asks RFC-Editor to publish as a RFC

SDO summary

- Lots of SDOs
- ITU-T is the primary telecommunications SDO
Founded in mid 1800s to deal with telegraph regulations
- IETF is the primary Internet technology SDO
Founded in 1986 to deal with Internet protocol standards

2 Copyright © Scott Bradner & Ben Gaucherin 2015

SDO types

- Traditional SDOs
Membership-based
Governments & companies
Governments have deciding vote
Approval requires consensus
- Most "new" SDOs
Membership-based
Companies
Approval requires consensus
- IETF
No members
Approval requires rough consensus

3 Copyright © Scott Bradner & Ben Gaucherin 2015

IPR

- IPR an issue for all SDOs
- Copyright & patent
